

Seth Chwast

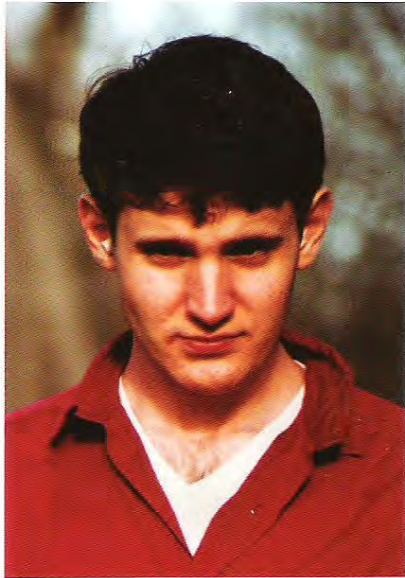

ABOUT SETH AND HIS ART

Seth Chwast was diagnosed with autism as a young child. A dramatic change in his life came at age 20, when Seth took a painting class at the Cleveland Museum of Art. Seth, who rarely speaks, began describing his world in color and paint. It turned out that he has an innate ability to mix colors and create amazing images that give him a "voice" and that connect him with viewers of all kinds. Now 24 years old, Seth Chwast's art has been exhibited and collected widely, and has been featured in the media extensively – including on NBC's "Today" show.

amazing images that give him a "voice" and that connect him with viewers of all kinds. Now 24 years old, Seth Chwast's art has been exhibited and collected widely, and has been featured in the media extensively – including on NBC's "Today" show.

Seth now paints daily, and has filled his entire home with art – spectacular landscapes with aurora skies and mysterious forests to magical worlds populated with birds, whales, griffins and pegasus. Horses are his favorite subject, and in his most recent paintings, they stand tall and proud and look viewers directly in the eye. Each of these astounding

paintings have a special way of making viewers feel the same way Seth does when he creates them. In his own words, handwritten on the back of each painting, Seth eloquently communicates: "I feel Happy. You are excited. I am excited. I am surprised. I am calm. I am Proud."
